## ORBITAL® 3000

### DESCRIPTION

The Orbital® 3000 shale shaker has proven itself in both the drilling and mining industry. It is a high performance, low maintenance design which incorporates longevity features such as seal welding and a multi-layer premium coating system for corrosion protection. The Orbital® 3000 is considered by many of our customers as one of their best investments on the drilling rig. Couple this with a patent pending screen seal that is as easy to change as a set of screens and it is no wonder the Orbital® 3000 has gained an unparalleled reputation with both rig owners and tool pushers as the best shaker in the oilfield.

### PERFORMANCE

The screen area of the 4 panel shaker is 30 ft<sup>2</sup> with an acceleration of 6 g's standard and 7.5 g's optional. The combination of screen surface area, high g's, and screen motion make the Orbital® 3000 one of the best performing machines in the industry. Orbital® shakers use progressive elliptical motion for extended screen life and excellent conveyance.
